

Utility solutions for the dental industry

Our Partnership with the BDIA is designed to offer advice to Members and help them manage their utilities so they can focus on their business.

Dental sector support

With the rising costs of energy impacting manufacturing, supply costs and margins, it is now more important to review how energy affects your business. Our experts use their extensive industry knowledge to help you manage your energy and water services to become financially leaner and greener.

Benefits

Our expertise lies in offering advice and sourcing competitive utility contracts tailored to your specific business needs, through our 20+ trusted suppliers.

Our services include:

- ✓ Energy & Water Procurement
- ✓ Energy Management Software
- ✓ Energy Efficiency Audits
- ✓ New Meters & Upgrades
- ✓ Billing & Rebate Support
- ✓ Dedicated Account Manager

Energy Business Solutions

We simplify the process and remove the burden of buying energy and other key utilities through advice, sourcing the right contract for your business through Fully Fixed, Blended, Flexible and Export tariff options.

Sustainability Solutions

We keep you compliant, maximise carbon savings and support your business to plan and achieve your net zero ambitions. From energy audits, DECs, EPCs, to ESOS and SECR we've got you covered.

Management Solutions

With ongoing Account Management and bureau solutions, we help you to proactively manage your energy and utility needs, saving you time and hassle and identifying saving opportunities.

On-Site Generation

Our specialists can advise and supply a number of on-site energy generation solutions including Solar PV, Battery Storage, Wind Capture and CHP. Financial options also include a 'No Capital Outlay' along with a variety of Finance options.
